MONDAY MORNING, JULY 8, 1550.

BJ'At no previous period, in the history of Newport as a fashionable watering place have there been so many delightfully aprecable funilies, located for the senson, in and on the outskirts of the tewn, as a this time. We have sober-minded, substantial and valuable persons from all parts of the country, who have taken hauses and collages, or are boarding at the tiotels and private houses. They do not come here exclusively to dissipate in all the follies and univariagences of the day, and to make themselves ridiculous by their constant abaurdities; but they pass their time in a rensonable and sensible manner, and are really valuable acquisitions to the place.-We hope to find the number of such familics increasing every year.

0.5-Te is proposed to light the streets of Nawport with gas; proposals for doing this will be received by the Telegraph Com-mittee. Any one who desires to secure the contract taust obtain the favoritism of a majority of the Committee, and obey their will in all things, as low and gospel, - and be eareful not to hand in their proposals until a late bour, and they will then be informed by the majority what terms will secure the contract to them. This is conhidered the latest and most honorable mode of delag business.

nr Some of the Telegraph Committee were making themselves citil more contains vible, on Saturday, after our revelation of the truth, by asserting that they did not Sknow that any one wanted the Telegraph ! We pity them if they can lie so easily.

CT-WANTED FROM CHOICE Write the lives of the Telegraph Committee, to be illustrated with a frontespiece of the opening of propetals for the Newport Telegraph,also with graphic partraits of the Commitsecistic whole to be bound in theep. Price per volume, six per cent on the cost of the

no-The man who opened our proposals for the Newpost Telegraph, before the hour when the Committee was to meet and disspace of the line, and who communicated the contents of the same to Mr. Kinsley, would rob a grave-yard and steal jewele from the death. But the public mark him as a dishonest man, and entirely unworthy -of the slightest confidence.

tel It is said that the night Police were tempest-commenced. They awake in the midst of it, and rushed for the auparvisory in imber of the Council and the Town' " prosecuting officer," to inform them that an onemy was approaching, and to know inhat should be done. They afterwards discovered that it was thunder and lightring whick-had subjectly alarmed them: convenuently an extra meeting of the Coun cil was not called.

Courtship is often made up of the fact that the girl calls her beau a poble youth, a hero, a genius, while he calls her a paragon of beauty and gentleness, and so they keep tickling each other until they go married, and then comes the scolling Netoport News.

Poor follow !-- are we to judge from this that you once reigned "a noble youth, a hero, a genius," and yours was called " n paragon of beauty and gentleness"—and that now is "the acclining scaems of life with you! Do tell!—Boston Rec.

OLD NEWPORT FOREVER .- The 10wn of Newport, R. I., has, with its necustomer liberality, voted the sum of screety-fire do. lars for the purpose of celebrating the Na-tional Anniversity of Independence. Tress-ty-five dollars are to be expended for a oration and music, ten dollars for fire works in the evening, and the balance for ringing the bells, firing a camon and furnishing ex-tra polico to look after the civizens during the day. III-" A national convention of handsome men's is to assemble at Newport, R. I. semotion this summer. The delegates are

to be elected by the ladics. - Lx. paper.
Of course, the gallant and handsome edi tor of the New York Mirror will be here as a delegato.

Miss Bromer, the Swedish authoress was among the visitors at the President's grounds, in Washington, last Saturday evening. She has as many followers in Washington as at the East, but her own knowledge of human nature, which is the same every where, teaches her to estrem such attentions at their true value. She is yet to take an extended journey to the far West, it is said.

JENNY LIND .-- Mr. Bainum has made arrangements with F. K. Collins & Co. to bring over the Swedish Nightingalo and her suite in one of their splendid United States mail Steamers. The party will consist of Jenny Lind and her female companion, Mr. Julius Benedict, Signor Helletti, Secretary, attendants, &c.

THE BATTLE FIELD CHARGED .-- Tho upot on which the battle was fought at San Jacinto, in Texas, was selected as the place for holding a camp-meeting on the 4th of July. "Where the soldiers bivouncked a few years ago, the standard of the Prince of Peace is now raised."

A CHARGE FOR THE LITERARY .- The publishers of the "Dollar Nowspaper" offer | England and America. five hundred dollars in premiums for the eight best stories written for that paper, and sent in for examination and decision before the 1st day of October next. The offer is two hundred dollars for the story decided to be the best; one hundred dollars for the second best; fifty dollars each for the two next best; and twenty-five dellars each for the next best. The only restriction which is imposed upon the writers is, that the aceno of each story shall be American,-The committee of literary gentlemen who are to determine on their merits, will not be chosen until all the stories are received.

Another Great Invention .- We undorstand that a new system of Magnetic machinery has been for some time discovered by William W. Rubbell, 18sq., a lawyer of this city, well known by his connection with numerous patent causes, as well as by several mechanical inventions of his. We do not pretend to comprehend it, but we are told that the power of this new magnetic machinery was discovered about 8 years ago, in an altempt to produce perpetual motion from it, in initation of the Solar system. His success then led him to the conclusion that the principles of the moving power in the Solar system were not perpetual; that they depended on agencies being continually their character. Of necessity therefore, he resolved his discovery into there indications of his experiments, and has produced what he calls a "Solar Magnetic Engine," which gives an incessant power, capable of being increased to any extent, stopped or increased at will, and graduated or governed by the single hand.

Mr. Hubbell himself is very cautious i speaking of the probable extent of the power and adaptation to machinery. He cave It is certainly much greater than any over before known, and thinks it may, in many cases, supersede steam. He seems how ever, to think that an engine of the kind would greatly disturb the compass at sea-and thus he seriously objectionable, even it it were all sufficient in other respects. He outertains little or no doubt that for Lecomotives and minur purposes it may be preferable to steam, un account of its simplicity, safety and the case with which the power of the engine can be taised, governed, and dispensed with whenever desired. He makes no promises, however, and is not going to let his invention interfere with his profession; but he thinks the principles of his new engine are sufficiently important to induce him to secure them in the United States by letters patent,

We are informed that his system of Magnetic machinery was explained yesterday to several gentleman of high scientific at-They were re: with it, understood its principals as soon as they were explained, and expressed the opinion that the favention was entirely original and displayed great study and in genuity .- Phil. Bulletin.

GOETHE'S PAPERS, which were lately opened at Weimer by the government for the first time since the decease of the poet, were left by him as a legacy in the year 1827, to the Goothe and Schiller families with directions that they should not be opened until the year 1850. At the opening, all of the descendants of the two great poets were present. The box contained the complete correspondence between Schiller and Goethe, which will be published in full.

Dreined .- Dr. George W. Bethung recently elected Chancellor of the University of the city of New York, has declined the tendered office. Engagements into which he had entered alsowhere, rendered its acceptance impossible.

"Kendalija Mexican War."-From a description of it by a writer in the New York Spirit of the Times, we learn that the illustrations of this work will consist of a series of twelve magniacent lithographic plates, executed in Paris, from drawings made on the spot by Nabel, and colored in the most natural and accurate style, illustrating the twelve principal incidents in the late Mexican war. They are done in the highest style of the pictorial art, and resemble the best water color paintings. The letter press (also executed in Paris) is exquisitely beautiful, and is said to be faithfully and cleverly written. The work is so arranged as to permit it to be bound into a magnificent folio volume, or to be kept in a portfolio, or to be framed. It cannot fail to be 'n very popular work; but we are afraid its necessarily high price will exclude it from the perusal of many who would desire to read it. The cost of the work will probably be something like thirty dollars.

The case of a poor Mexican is related in one of the latest journals. It seems she was attacked with cholera and supposed to be dead. The carri ers of the dead bore her to her last als ode and interred her. In the greapress of business, they did not bury her very deeply. She came to herself, and was strong enough to scratch away the carth, and leave her shallow grave. She sought the abode of a charitable person, who kindly gave her lodgings This should be a warning to those who urge speedy interments.

WASHINGTON, July 5: SERATE .- Mr. Cass's resolution, respecting the search of American vessels by the

British, was adopted, After a brief discussion concerning the graduation and disposal of public lands,

without making any casential progress, Mr. Bell resumed his speech. He alhaded to the features of the bill, and deaird that the President exercised his authority against the bill. He showed that the object was to throw the responsibility on the Administration whatever the fate of the bill.

Mr. Bell is now examining into the real ralno of the proposed increase.

House -- Mr. Giddings asked an investigation into the charges in the Washington correspondence of the Boston Atlas.

It stated that correspondence in reference o the Obetlin postmaster was passing from the Post Office Department, and was last examined by Mr. Giddings.

A point of order was raised that it was not a question of privilege, whereupon an appeal was made. A debate then follownd, and various proceedings are now up. There is an unusual reneation upon the subject, which is still pending.

BALTIMORE, July 5.

RIDTS, &c. - Considerable disturbance occurred yesterday in and around this city, and a riot of a serious character at the Spring House, near the city.

The house was stoned and several shots were fired. A boy, named George Robinson, was thought to be fatally wounded .-Another boy, and a man named John Horn, were beaten, and the latter had his arm broken in four places.

A man named Mullen was standing : on the railroad platform, near the Rolay house, when his head was struck by the switch lever, and he was seriously wounded.

A man whose name we were not able to learn, was stabbed on board the steamer Erriakson.

Light! Light!! The Handsomest, Cheapest, and Best Article for Light, is MARSIUS PATENT OIL.

MARSH'S PAYENT OIL.

THIS is a new investion, recently introduced, and now very extensively used by the public.

Mr. Marsh is constantly receiving, thoth not home and from abroad, I the very highrest testimonials of the true nerits and great superiority of his new Oil, over everything before used for light.

Annung them we select the following:

MARSH'S PATENT OIL.—This is the reason given to a newly invented Oil, for producing light, which has just been introduced to the public by Mr. Marsh. Having tried it ourselves, we can speak from experience, and do not hesitate to award it a high order of merit. It is entirely fee from grease or small while harning, and is not liable to the toe common education of almost off harning mids, that of explacion. It gives a beautiful and steady light, is much handsomer than oil, and costs less. For a slight expense, common gial control less. For a slight expense, common gial control to the market of the commend a trial to those who would obtain a beautiful light.—Hoston Joanad.]

The Plaid is a chemical compound of sufficient
strength to extract all foreign substances from the
cloth, by simply boiling a small quantity of it with
the clothes, and without the slightest injury to
the most delicate fabric.

The expense is not more than that of the soap
ordinarily used, and berides this it will be seen
that the great warrand tear of clothing consequent
upon the old method offurd tubbing elemants
and the use of the pounding barrel, is wholly avoidall, and an immeases aming is thus made. It is emphatically the fenale's friend.

WASHING, BLEACHING AND CLEANSING FLUID.

THE greatest labor-saving article yet discovered.

By its usr, washing machines and beards are
dispensed with, and not one quarter of the labor is
required to do the washing of a family.

The Phild is a chemical compound of safficient
strength to extruct all foreign substances from the
cloth, by simply boiling a small quantity of it with
the clothes, and without the slightest injury to the
most delicute fabric.

The expense is not more than that of the scap
ordinarily used, and besides this it will be seen that
the great wear and tear of clothing consequent upon
the obtine the of hard rubbing poon a baard, and
the use of the pounding barrel, is wholly wrould;
insurans saving is thus made. It is complatically
the female's friend.

Warranted to give perfect ratisfaction, or the
money will be refunded,
Manufactured by Charles Dyern, Jr. Providence, R. I.
